why our fly boxes rock

Beauty & Durability

Premium quality boxes, crafted to perfection out of carefully selected, thermally processed and dried prime European walnut wood. This exotic wood is one of the most durable woods. Its compact structure provides strength, hardness, and durability without weight, making these boxes solid, strong and lightweight. Walnut has beautiful texture, its grain goes anywhere from straight to wavy, giving each box a unique character.

Quality Workmanship

Each box has been crafted with great attention to detail. After precision machine-cutting to ensure consistent dimensions, & shape, each box is carefully sanded by hand to perfection. Surface is protected against the elements - hand-finished with eco-friendly wood oil in three layers, providing great durability, beautiful appearance and preserving the natural look of wood.

Ultimate Convenience

Premium hardware - each box is fitted with strong inset magnet closures keeping the box firmly closed until needed. These magnet lock mechanisms feature neodymium magnets glued with two-component (2K) epoxy adhesives. Small brass inset cylinder hinges are snag-free and do not get in the way when you pull the box out of your fly fishing vest.

Safe & Tight Flies

High-quality foam fly keeper keeps the flies tight and safe. Moderately soft foam with precisely cut micro slot inserts secures hooks in place without damaging the flies. There is no pushing of the hook into the material - the hook is simply slid into the provided insert. This foam is also non-absorbent ensuring your hooks do not rust and making these boxes an ideal fly keeper. It holds barb-less hooks as well as regular hooks.

- Our large size fly box.
- Premium solid walnut - naturally durable, strong & lightweight.
- Beautiful wood texture, each box with unique character.
- Superior workmanship - hand-sanded to a perfect smooth finish.
- Protected and preserved: hand-finished with three layers of eco-friendly wood oil.
- Inset neodymium magnet closures keep the box firmly closed.
- Snag-free brass hinges.
- High quality foam fly keeper with micro slot inserts secure hooks in place.
